Mark Noonan of DMI was present to explain the business dist and answer any questions the residents had.

The purpose of a business district is to bring in new businesses. School and state property are included in order to be able to do work on the streets using some of the tax for infrastructure. You want to stay away from residential property.

The business district does not change the zoning of the property.

Each property owner would make an agreement for a portion of the sales tax collected. As of now only the grocery store would be the only property taxed in the in the business district. The sales tax has to be the same for the whole district.
